THANK YOU!

FALL
2024

At the blood drive we had in August we saw 24 donors and collected 26 units of life saving blood! Those units will directly impact the lives of up to 78 patients as they battle cancer, receive a transfusion for a blood disorder or undergo surgery. We were able to get 7 first time donors to join us and 3 power red donations which the hospitals truly need!

FIRE LIFE SAFETY

TRAINING

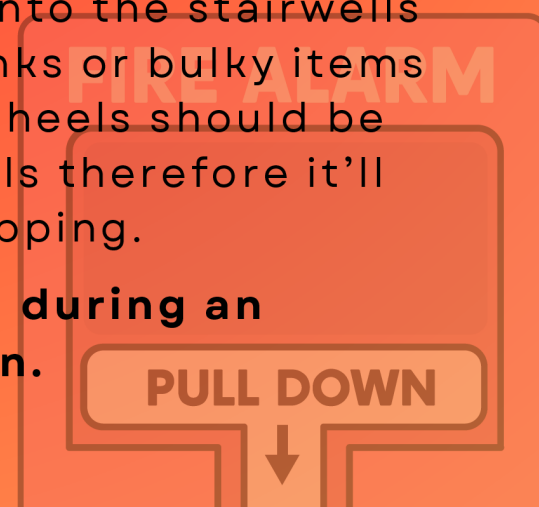

Because your safety and time is very important, the management office provides all occupants of this building with fire life safety training procedures.

Our fire drill went great all floors were evacuated in 4 minutes or less. Floors completed all tasks, floor wardens and monitors wore emergency vests directing the evacuation and were the last to leave the floor.

All occupants should participate during a fire drill evacuation.

Nothing unnecessary should be taken into the stairwells during an evacuation such as food, drinks or bulky items due to that it can be hazardous. High heels should be removed before entering the stairwells therefore it'll prevent occupants from tripping.

Elevators are to never be used during an emergency evacuation.
